

# DevOps Health Check Assessment and Roadmap

**8+ years of DevOps experience**

From our years of experience helping clients modernize their software development processes and implement DevOps, we've developed a maturity matrix to help you quickly gain critical insights, identify pitfalls, and progress to the next phase within your organization.

**Predictable outcome**

**Deliverables include:**

- ▶ Detailed Interview notes from all Stakeholders and DevOps team members
- ▶ Assessment on existing automation tools/processes in place – including scorecard
- ▶ Recommendations on next steps for automation tools & processes
- ▶ Assessment on team skills/capabilities in place – including scorecard
- ▶ Recommendation on next steps for teams members to level up in DevOps

**5 week engagement**

**An experienced senior consultant will:**

- ▶ Connect with key stakeholders and team members within your organization to review project objectives and approach
- ▶ Review all existing automation processes and overall CI/CD workflows within the team and toolsets
- ▶ Capture and document the desired vision from the executive/management team on the ideal end state
- ▶ Provide analysis/best practices to fit your specific organization based on current technologies, target vision, and team capabilities
- ▶ Review findings and recommendations with key stakeholder group
- ▶ Finalize recommendations and present to teams as requested
